Problem and Objective Analysis

Coastal Management Plan

Core Problem	Core Objective
Communication between MPA committee and board of director tourism	Improve communication between MPA committee and community board.
Problem	Solution
<ul style="list-style-type: none"> -Sharing of information in MPA board is not enough. -People cannot think properly, because of too much drinking of kava. -Monitoring activities are not strong -MPA management is no clear 	<ul style="list-style-type: none"> -Feedback information to the community -Enforce by-law on resource management -Conduct appropriate training for monitoring activities.
<ul style="list-style-type: none"> -Activities in management plan are too much. -MPA management plan is too specific, eg. trochus. -Activities are not prioritized. 	<ul style="list-style-type: none"> -Reduce activities of management plan, ex. not too much specific, putting priority, reducing activities.
<ul style="list-style-type: none"> -Information does not feedback to the community. -There is not enforcement of the by-laws 	<ul style="list-style-type: none"> -Improve accountability and transparency in MPA committee and community board.

Livelihood in the Community

Core Problem	Core Objective
There are not ways and ideas to make money	Through the project, improve the livelihood condition from fisheries resources.
Problem	Solution
<ul style="list-style-type: none"> -Fishing activity is not enough. -There are not many boats to go out fishing -There are not enough FADs -There is not a proper market facility -No fishing gears -Fuel cost is too high. -There is not a processing point or processing house e.g. jetty 	<ul style="list-style-type: none"> -More fishing activities to add value to fisheries resources, and other income sources, eg. agriculture and forestry. Establish a fisheries center for local fishermen to get advices and information, access of duty exemption on fuel, fishing gears, and encouragement.

-There is not enough community human resource -No training programs on food processing

Organization / Governance in Community

Core Problem	
Community think MPA committee is organized for government (fisheries department), but not made up for the community.	
Problem	Solution
-People do not care the introduced projects. -No leader to tell good ideas to the community. -There is no cooperation within the community. -There are not enough awareness of the project, in school, church, kava bar (nakamel) -The project idea is not conveyed in simple way (bislama)	-Make more awareness to the community in simple way in Anaucauhut sub-district
-Not enough support from the community -Support from chief is not much strong. -People think only about money. -There is land dispute in the community. -Disrespect the community	-Promote the activities and tasks of MPA committee, fishermen association, and FAD committee in leaders and community members in sub-district.

Supporting System

Problem	Solution
-Provincial Government does not give financial support -Provinces does not give enough finance and technical supports. -There is not a financial support stakeholder locally. -There is not enough support from fisheries extension officers -There is not enough support from government, NGOs, province.	-Strengthen financial support from provincial government and technical support from fisheries department and NGOs.
